Published November 2009, jps

The purpose of this publication is to assist park visitors in trip planning and in locating established campsites. By using established campsites, you will be assisting in the protection of our natural resources by minimizing the overall ecological impact as well as reducing disturbance to wildlife and cultural areas.

Please note that this is an ongoing project and that not all campsites have been confirmed in existence and in location. In addition, campsites are not always obvious from the water and an existing fire ring may not be present.
